TS-SP08B2000-0210

2-WAY NORMALLY CLOSED

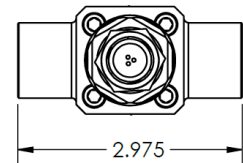

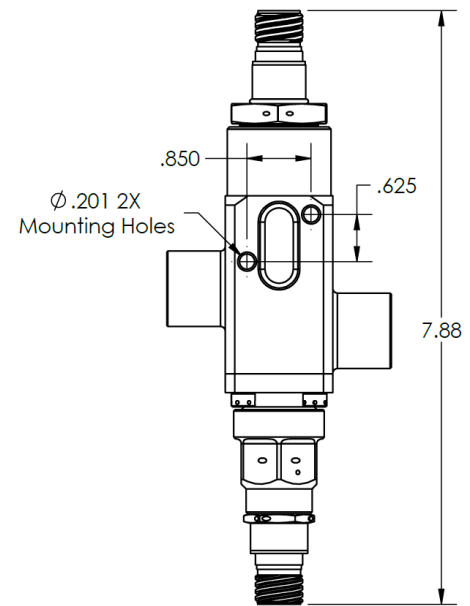

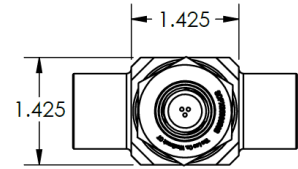

PILOT-ACTUATED POPPET VALVE

PRODUCT OVERVIEW

The TS-SP08B2000-0210 from Triton Space Technologies is a pilot-actuated solenoid valve with 1/2" O-ring boss ports. This valve is pilot actuated by a 3-way miniature solenoid valve that utilizes internal upstream pressure to actuate the main poppet such that no external actuation gas is required. This valve features a mechanical position feedback switch which provides confirmation that the poppet has stroked fully open. The TS-SP08B2000-0210 is purpose built for 21st century spaceflight feed systems. Contact us today for more information or to place your order.

Parameter	Performance
Valve Body Pressure Range	100-2,000 psia
Valve Body Proof Pressure	3,000 psia
Valve Body Burst Pressure	> 5,000 psia
Connectors (Inlet/Outlet)	AS5202-08 O-Ring Boss Port
Liquid Flow Coefficient (Cv)	2.5
ESEOD ($C_d = 0.6$)	0.375 in
Valve Actuation Time (OPEN)	< 200 milliseconds
Valve Actuation Time (CLOSED)	< 500 seconds
Wetted Materials	7075 Al, 7050 Al, 316 SS, Fluorosilicone, PEEK
Main Seal Material	PEEK
Seal Materials	Fluorosilicone (70 Durometer)
Internal Leakage at RT	1×10^{-2} sccs He
External Leakage at RT	1×10^{-3} sccs He
Nominal Voltage	28 VDC
Operating Voltage Range	18 - 36 VDC
Current Draw at 28 VDC	0.28 A
Electrical Connector	MIL-DTL-38999/25YA98PN
Dimensions L X W X H	2.98" X 1.43" X 7.88"
Operating Temperature	-65 °F to 150 °F
Weight	1.1 lbs

KEY FEATURES

- Internally piloted by upstream pressure
- Normally closed
- 2,000 psi MEOP
- Current draw < 0.5 A
- Lightweight – under 1.2 lbs
- Service fluids: GN₂, N₂O, GHe, RP-1
